SUMMER STUDY ABROAD PROGRAM

Explore Psychology in Rome, Italy! Students will engage in the study of child development, biopsychological processes, and social psychology from the perspective of living in and immersing themselves in this unique culture. Students will have the opportunity to increase their cross-cultural understanding of important psychological theories while exploring Italian history and culture through excursions within and outside of the city center of Rome. Students will also have the opportunity to explore the application of psychological theories to everyday life in a European context and to compare that to the U.S. context.
